- * **Taiwan's Natural Environment.**

Program includes:

- ◆ a short **Chinese** language-learning program
- ◆ a **cultural** immersion program
- ◆ a short-term professional internship or research **internship**

Japanese students studying in Taiwan

3. Bilateral Cooperation between Japan-Taiwan Universities

Taiwan Education Center funded by MOE & two offices have been set up by Taiwan's universities in Japan.

NCTU has an office
at Tohoku University

NTU has an office at the
University of Tsukuba

Taiwan Education Center
at Hosei University

National Central University & Hiroshima University

**Taiwan Study Center at
National Central University**
- since 2013

Double-degree program

10 engineering students
from each university

11 Agreements

The START program - Study
Abroad for Realization and Transformation -
sends 1st year students to
universities in Taiwan on
exchanges.

Hiroshima University

広島大学

National Central University

14 Agreements

Winter camp program lets
NCU students study
Japanese and culture at
Hiroshima University.

**Co-organized the
International Conference on
Machining, Materials &
Mechanical Technologies.**
- IC3MT 2014, 2016

National Taiwan University & the University of Tsukuba

*CiC: campus in campus

National Chiao Tung University & Tohoku University

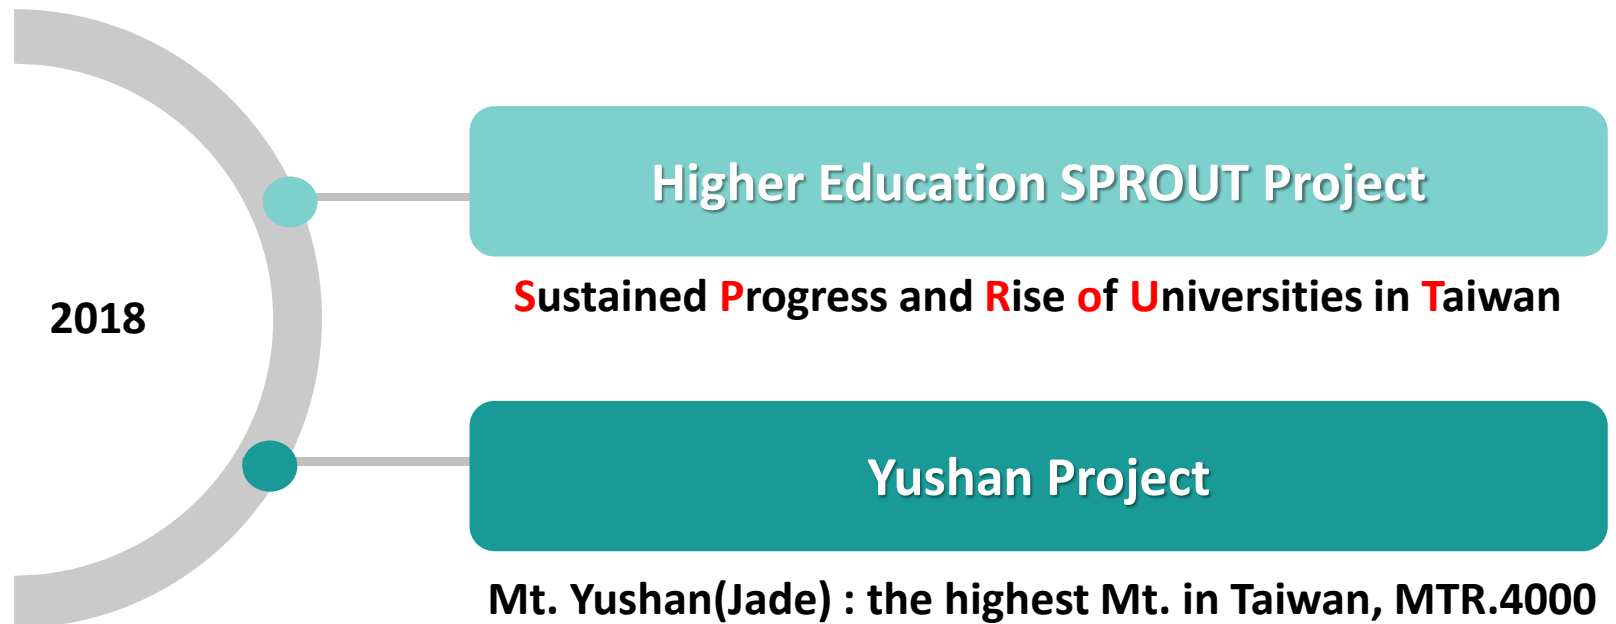

Office of Tohoku University at
National Chiao Tung University

Office of NCTU at
Tohoku University - since 2017

4. MOE New Projects

Higher Education SPROUT Project

Part 1

Enhance the quality of universities &
Encourage multi-faceted development

Develop university features

- Industry collaboration
- Research capacity
- Internationalization
- Unique strengths

Fulfill Social responsibility

- Encourage social innovation through teacher-student partnerships
- Upgrade local industrial development

Safeguard students' right to education

Make teaching the core

- Establish faculty professional communities
- 6 proactive abilities

Make resources more accessible

- Foster social mobility
- Lower student-to-faculty ratios
- Promote transparency

Part 2

Assist universities to build leading research centers &
Elevate their international competitiveness

Build leading research centers

- Enhance excellence in specialized areas and research by integrating each university's specialization and industry resources.
- Actively recruit and nurture outstanding innovative people & expand the training and education of the nation's human resources.

Demonstrate internationally competitive strengths

- Accelerate the internationalization of top universities and expand students' global vision.
- Enhance the quality of universities' research and innovation, and strengthen their international academic impact and reputation.

Yushan Project

Purpose

The Ministry of Education launched the Yushan Project in 2018 to attract and retain more exceptional academic and research personnel.

- Top academic and research personnel from abroad can be designated as **Yushan Scholars**.
- Yushan scholars can receive up to **NT\$5 million** each year in addition to their university salaries for at least three years.

Yushan Scholars

- recruited globally

- **NT\$2 billion** each year & greater flexibility - for universities & colleges to pay internationally competitive salaries to outstanding current and newly appointed academic and research personnel.
- Universities have independent control of their faculty salary structure.

Flexible salary payments

- to promote excellence in universities

- **NT\$600 million** (**US\$19.8 million**) each year will go to public colleges and universities, to retain outstanding professors.
- **NT\$550 million** (**US\$18.15 million**) each year will be awarded to private colleges and universities.

Increased research allowances

- merit based

ご清聴ありがとうございました。
