Currently he is Vice Chancellor for International Relations of the University of Salamanca and Member of Executive Board of Coimbra Group.

University Introduction

Dialog between universities in Japan and Spain

Name of University: _____

The **University of Almeria** was created by the Andalusian Parliament in **1993** as a proposal of the Governing Council of the Andalusian Regional Government. Some figures reflect the dramatic growth of the University of Almeria:

- The number of students has more than doubled from 6,600 in 92/93 to around 14,500 the current academic year. Our institution also has nearly 500 PhD students.
- The faculty has increased from 374 in 92/93 to over 800 today.
- The administrative and service staff has grown from 130 in 1993 to over 500.
- The number of research groups, which was 17 in academic year 93/94, now exceeds one hundred.

According to the importance of Almería Economy Sectors, the recently approved Strategic Plan established Agro-Food and Environmental Studies, Computer related engineering focused to the agro sector, renewal energies, biotechnologies, and so that are priorities for the UAL. The strategy of internationalization of our institution (line 5) includes increasing mobility from and to UAL from institutions all over the world. In the recent years and according to this strategy, the number of European agreements has doubled, from 133 in 2007 to near 1000 in the year 2018. The growth has been even more significant in the number of institutions outside Europe (from 165 to 412). In this context, for us, Asia is a priority area for mobility (Japan, South Korea, Taiwan, Malaysia, Indonesia). We are ranked as the 5th university in absolute terms, and 1^o in relative terms for the KA 107 mobility program. We are the recipient for the Management Quality for Erasmus+ 2018 and, as said, we are seeking for partners in Asia (KA-107). With Japan we are in the process of signing agreements with Meiji University and Sophia University.

University Introduction

Dialog between universities in Japan and Spain

Name of University: **UNIVERSIDAD DE BURGOS**

1. University Short Description (About 300 words)

The University of Burgos is located within the Campus of San Amaro, which boasts an extremely fine historic enclave: the Hospital del Rey. A former hospital for pilgrims of the Road to Santiago, it was founded in 1195 by Alfonso VII.

Within the university campus both the ancient heritage and the most avant-garde facilities and technology coexist in a perfect dialogue of harmony that favours both teaching and innovation. Furthermore, the University of Burgos is located just a short distance from the core centre of Burgos, a city whose artistic monuments and history are a lure and an invitation to study the Spanish language and culture. Burgos is also a privileged city, peppered with most attractive parks, promenades and natural spaces, some of which can be enjoyed within the university campus, making possible both contact with nature and the practise of leisure and sporting activities.

The University of Burgos has currently about 8.000 students and offers courses leading to over 40 under and post degrees, as well as Ph Programmes.

The University has a relevant position in the prestigious World University Ranking 2019 (THE). It ranks the 29 among the 38 Spanish institutions included.

It is a modern, dynamic and innovative university with a broad international projection, whose mission focuses on:

- Provide a comprehensive quality education to our students, which allow them to become competent professionals, thus facilitating their subsequent insertion in the workplace.
- Be the scientific engine and contribute to the social, economic and cultural development of Burgos and Spanish society, through the creation and transfer of knowledge.

All this, thanks to the commitment, enthusiasm and dedication of all the people who work and collaborate with our university.

University Introduction

Dialog between universities in Japan and Spain

Name of University: Universidad de Castilla-La Mancha

1. University Short Description (About 300 words)

The University of Castilla-La Mancha came into operation in the year 1985 although it was officially created by law on the 30th of June 1982, as a result of the autonomy policy and collective desire shown by Castilla-La Mancha society which was shared by the regional government.

From its first days this academic institution was an element for cohesion and had a clear aim in mind: to act as a fundamental cog for economic, social, cultural and technological development for the Autonomous Community, providing solutions for its present and future needs.

In its thirty years of operation, the UCLM has provided young people with access to higher education and has dynamized life in the cities where its four campuses have been established: Ciudad Real, site of its vice-chancellorship-, Albacete, Cuenca and Toledo. At present, teaching extends to the towns of Almadén (Ciudad Real) and Talavera de la Reina (Toledo).

The University of Castilla-La Mancha is a modern and competitive institution, with almost 30,000 students, 2,270 lecturers and researchers and 1,059 administrative and service staff. We are passionate about discovering what lies behind the obvious, to deepen our knowledge of science, to stir up culture and share it with you.

The UCLM is a smart move for those who are shaping their future, for those who wish to gain more training throughout their life and for foreign students pursuing academic enrichment, vitality or language learning. It is also for companies who will find a wide variety of research, development and innovation opportunities in our research portfolio (R +D + I)

EURM UE would like to partner with Japanese universities looking for international experiences for its students related with any area related with Higher Education at Sports Industry. All of it with collaborated by one of the probably most known and successful Sports brand and club in the world.

University Introduction

Dialog between universities in Japan and Spain

Name of University: University of Extremadura

1. University Short Description (About 300 words)

The University of Extremadura (UEX) was founded in 1973 ((Decree 991/1973, 10th May 1973 BOE 18th May 1973). Its history is intimately linked to the region of Extremadura. Initially, the University was made up of the Faculty of Sciences in Badajoz, the University College in Caceres, the University Schools for primary teacher-training in Caceres and Badajoz and the School of Agricultural and Technical Engineering in Badajoz. Since its opening, UEX has seen a rise in student numbers, degrees and centres, expanding to a total of four separate centres, including the campuses in Badajoz and Caceres, the University Centre in Merida and the University Centre in Plasencia.

More than 24.000 under-graduate and post-graduate-level students study at UEX, along with a further 8.000 students who are completing doctoral studies or other courses. 1.500 teachers and more than 800 administrative, technical and service staff work at this University. The Rector is Dr. Píriz Duran and the Governing Body of the University is made up of different professional bodies, such as the Governing Senate and Council and university staff members such as the Vice-Rectors, Management and General Secretary.

University Introduction

Dialog between universities in Japan and Spain

Name of University: Universitat de Girona

1. University Short Description (About 300 words)

The University of Girona (Universitat de Girona, UdG, www.udg.edu) is located in the city of Girona, Catalonia, Spain. It was reconstituted as a university in 1991, although its origins go back to the General Studio, an entity created in 1446. The UdG consists of 3 campuses and several buildings across Girona: Montilivi, Barri Vell, Centre, and the Scientific and Technological Park. Since its founding, the university has had five presidents (rectors in the Spanish system) being Joaquim Salvi the current rector since 2017. Despite being a young and relatively small university, it has been placed within the top 4% of universities in the World University Rankings 2018.

At a bachelor level, the UdG has more than 15,000 students divided in 44 BSc degrees (including 12 double degrees) and 3 international BSc degrees and all disciplines: education, law, business and economics, engineering, sciences, art, medicine, humanities and literature and tourism.

Regarding master students, UdG has 25 official master studies, 15 inter-university masters and 12 double-degree international master agreements, with a total of 1,000 students. Master studies focus in several fields: Molecular Biology and Health; Human, Cultural and Heritage sciences; Law, Economics and Business; Education and Psychology; Chemistry and Natural environment; Tourism and Technology and Engineering. Moreover, coordinates 2 Erasmus Mundus international Master studies: European Master in Tourism Management (EMTM) and the European Master in Medical Imaging and Applications (MAIA).

With respect to doctoral studies, UdG has 800 PhD students enrolled in 14 PhD programs with more than 100 PhD thesis defended every year. The PhD programs include Molecular Biology; Water Science and Technology; Human, Cultural and Heritage sciences; Education; Natural environment; Psychology and health; Chemistry; Technology and inter-university studies in Art and Education, Bioinformatics, Law, Economics and Business, Gender studies, Educational Psychology and Tourism.

In research, the UdG has 60 well-established research groups, with 175 active research projects. In terms of outputs and only in the last year, it has produced 56 books, 233 book chapters, 3 patents and 870 ISI indexed journals.

In terms of services and facilities, it has 3 libraries with more than 10,000 square meters, and half a million books (including electronic), the scientific Park (with more than 100 companies and 1,500 people), accommodation and sports, restaurants, computer rooms, and a language center.

University Introduction

Dialog between universities in Japan and Spain

Name of University: **University of Granada**

1. University Short Description (About 300 words)

The **University of Granada** is a public university founded in 1531 by Emperor Charles V. Approximately 75,000 individuals – students, researchers, lecturers, and administrative and support staff – are directly linked to the UGR, making it the 4th largest university in Spain.

In 2017, the University of Granada ranked 268th in the world and 2nd in Spain in the recently published Shanghai Academic Ranking of World Universities (ARWU 2017). The UGR is second only to the University of Barcelona in the ARWU. Particularly noteworthy are the UGR's achievements in the subjects of Food Science & Technology (30th worldwide) and Computer Science & Engineering (33rd worldwide). Moreover, our University is ranked among the top 151-200 global institutions in the subjects of Electronical Engineering, and Instruments Science, as well as among the top 201-300 universities in Biomedical Engineering, Civil Engineering, Environmental Science & Engineering, and Agricultural Sciences. Given this exceptional performance in the prestigious ARWU, the academic year 2017-2018 promises to be another momentous era for our Institution.

In 2017-2018, over 46,000 undergraduate students were enrolled on our 89 bachelor's degrees at the UGR, with an further 5000+ students set to enrol on our master's degrees. Additionally, the UGR further increased the scope of its graduate offerings for the academic year 2017-2018, including 110 master's degrees and 28 doctoral programmes.

In 2017-18, the UGR maintained its position as the most popular destination among European exchange students (Erasmus+). For over a decade, our University has consistently received and sent more international students on Erasmus exchange programmes than any other European. Thus, 2,600 new exchange students from over 70 countries completed studies at the UGR last academic year, thanks to the diverse range of mobility programmes on offer at our Institution. Collectively, the UGR participates in more than 740+ international bilateral and multilateral exchange agreements with institutions around the world.

Finally, we are a founding member of the international Coimbra Group, an association of European universities at the forefront of higher education. We are also a member of a vast array of other prestigious international networks, such as the European University Association (EUA), the Iberoamerican University Association for Postgraduate Studies (AUIP), the International Association of Universities (IAU), the European Association for International Education (EAIA), and the Association of International Education Administrators (AIEA), to mention just a few.

University Introduction

Dialog between universities in Japan and Spain

Name of University: Miguel Hernandez University of Elche

1. University Short Description (About 300 words)

The Miguel Hernández University of Elche was established by the Generalitat Valenciana in 1996, and teaching activities began in the fall of 1997. The UMH, whose main campus is located in the city of Elche, operates 4 campuses in all: Altea, Elche, Orihuela, and Sant Joan d'Alacant. Its campuses extend over almost 95 hectares, there are 75 university buildings, and constructed areas cover about 210,000 m². Currently, the UMH is home to 25,247 students, of which 13,002 are enrolled in official degree programs (bachelor, master, PhD), with the remaining 12,245 learning in continuing education programs. The budget for 2018 is 109,626,641 €.

The Miguel Hernández University has 7 faculties (Faculty of Experimental Sciences, Faculty of Fine Arts, Faculty of Health and Social Sciences, Faculty of Medicine, Faculty of Pharmacy, Faculty of Social and Legal Sciences of Elche, and Faculty of Social and Legal Sciences of Orihuela) and 2 schools (School of Engineering of Elche and School of Engineering of Orihuela). Three prestigious research institutes lead investigation in the areas of biotechnology and biomedicine (Institute of Bioengineering; Institute of Research, Development and Innovation in Health Biotechnology of Elche; Institute of Neurosciences). The UMH is the top Spanish university in creating technology-based companies (IUNE Observatory), it is in 4th position in the U-Ranking of Spanish universities in terms of productivity, is 5th in the ISSUE Ranking for Teaching, Research and Innovation and Technological Development among Spanish universities, 6th in the ranking of annual scientific production per professor in Spain, and 1st in the Valencia Region (publications per faculty member).

Regarding academics, the Miguel Hernández University of Elche offers 25 bachelor's, 53 master's, and 13 doctoral programs. In addition to these official programs, the UMH also offers hundreds of its own continuing education courses and programs, including University Expert, unique UMH Master's, Advanced University Diploma, University Specialist, Summer, Winter, Refinement, Bridging, university access, and language instruction, among others.

UMH employees include 1,085 research personnel and teaching faculty, of which 552 are full-time and 521 are part-time. As for its researchers and faculty, 712 hold PhD's. There are 463 university staff employees, and 275 employees are contracted through projects.

To consolidate international presence and projection, the Miguel Hernández University of Elche maintains 593 agreements with foreign universities, 360 with Spanish universities, and 16 agreements for joint degree programs with universities outside Spain. As for mobility, the UMH helped send off 281 outgoing students to learn elsewhere during the 2017/2018

academic year while it welcomed 290 incoming students into its classrooms. These incoming figures include individuals who came to the UMH for internships, on study abroad programs, and as visiting students.

Moreover, the areas of Internationalization and Linguistic Support are involved in various areas to advance the international presence and projection of the UMH.

University Introduction

Dialog between universities in Japan and Spain

Name of University: Universidad de Murcia

1. University Short Description (About 300 words)

The University of Murcia is a hundred years old institution, and a reference center for higher education in the Region of Murcia (southeast of Spain). This international institution plays a very important role not only in research and teaching, but also in society itself, acting as an essential social engine and as a connecting bridge for each teaching and research activity, as well as for any investment that is made out on the Mediterranean coast.

In some disciplines, currently it is positioned at the top of the world ranking, as in the ranking of excellence CWTS Leiden, where the research in mathematics and computer science of the University of Murcia occupy the second place. Examples of this level of excellence are also the realization of numerous competitive projects at national and international level (such as the Mare Nostrum Campus of International Excellence), as well as the clear social commitment recognized in 2014 with the Telefónica Ability Award received for being the best public entity with respect to the inclusion of people with disabilities. Other acknowledgments of excellence are the Certificate of International Students Satisfaction by Study Portal in 2016, Commitment to European excellence to the International Relations Service by EFQM and International Accreditation of the Faculty of Veterinary by FVETUM 2016, 2017 and 2018 (cooperation with Japanese universities in the Master of Biology and Technology of Mammalian Reproduction).

UM is a public university teaching 32,462 students on 5 campuses. The University has 3,030 teachers and 1,216 members of the administration and services whose human and professional capital makes life easier at the University for students and society on a daily basis. The University of Murcia offers 55 degree programs, 73 master's programs and 35 doctoral programs (with 337 research groups and 4 University Research Institutes), some of which provide bilingual classes in English and the possibility of obtaining a double degree with partner universities in Europe, Latin America and Asia.

Internationally, the University of Murcia has signed agreements with more than 900 universities around the world. It is a reference center for the European Commission and the large number of projects coordinated by our institution is proof of this. There is a considerable number of exchange programs, with an annual mobility of around 2,000 people in both directions (incoming and outgoing), which is why our institution is the best representative of the reality in our region and a key player in the Mediterranean area. Therefore, the UM has a strong presence in the local and regional community, and gives significant importance to work at the international level, as a means to serve this community through excellence in teaching and research.

University Introduction

Dialog between universities in Japan and Spain

Name of University: Universidad Pablo de Olavide

1. University Short Description (About 300 words)

Founded in 1997, Universidad Pablo de Olavide (UPO) is a public institution that is committed to delivering outstanding higher education. UPO is set within a single campus covering an area of 140 hectares, in the municipal districts of Seville, Dos Hermanas and Alcalá de Guadaira, where teaching and research are developed alongside socio-cultural and sport activities. The University has additional sites in the city of Carmona and in the centre of Seville. As a space for higher education, Universidad Pablo de Olavide is at the service of society and is defined as a place for reflection and critical thinking, committed to contributing to progress, teaching respect for fundamental rights and public freedoms, fostering equality between women and men, solidarity, and human values, and responding to the needs and problems of today's society.

Universidad Pablo de Olavide has eight Centers: the Faculty of Business and Administration; the Faculty of Experimental Sciences; the Faculty of Social Sciences; the Faculty of Sport Sciences; the Faculty of Law; the Faculty of Humanities, the Polytechnic School; the San Isidoro Center (associated with the UPO) and the Postgraduate Center.

The Area of International Relations and Cooperation (ARIC) is responsible for managing mobility programmes, which account for 10% of the UPO's university community, and international cooperation projects, developing the University's internationalisation strategy within this sphere.

The mission of the International University Centre (CUI) is to organise and offer short-term and semester-long academic programmes in both English and Spanish to international students in areas which include but are not limited to, Spanish language, history, business, communication, literature, political science, psychology and the sciences.

Universidad Pablo de Olavide develops its various research strands through 97 nationally and internationally competitive research teams with a high capacity to collaborate in their productive and social environments. UPO also has its own research centres to develop specific advanced research projects, along with two mixed centres: the Andalusian Centre for Development Biology (UPO/CSIC/ Junta de Andalucía) and the Andalusian Centre for Molecular Biology and Regenerative Medicine (CSIC/Junta de Andalucía/US/UPO).

University Introduction

Dialog between universities in Japan and Spain

Name of University: **University of the Basque Country**

1. University Short Description (About 300 words)

The Basque Country, located at the centre of the Atlantic Axis, offers a magnificent opportunity for studying, leisure and working, in a friendly and safe environment.

Today, the economic development of our country is founded on a commitment to technology, quality services, innovation and knowledge.

In this context, the contribution of our university, the University of the Basque Country, is fundamental.

The professionals we train have been at the forefront of the economic, social and cultural development of our country, leading its scientific and technological research, as well as its higher education.

We believe in the capacity for transformation of the university and in the responsibility it has towards society.

We believe in a university that researches and innovates, with a strong involvement in the industrial fabric and with close ties to technology and research centres.

We believe that our students must acquire the knowledge and the tools necessary to build an advanced, egalitarian, balanced, committed and enterprising society.

To achieve it, the University of the Basque Country, comprising three campuses in Álava, Biscay and Gipuzkoa, offers a framework for studying, for research, which strives at all times for excellence, constant improvement, and capable of materialising its efforts.

The University of the Basque Country offers its students highly specialised and competitive graduate and postgraduate degrees in all fields of knowledge: 70 degree courses, 120 Master degree and 65 PhD programmes

It is the leading research institution in its region, placing it among the world's 400 top universities, according to Shanghai Ranking.

Along with teaching and research, the University of the Basque Country promotes the arts and social responsibility, it encourages entrepreneurship and has an influence on the most current political and social debates.

University Introduction

Dialog between universities in Japan and Spain

Name of University: UNIVERSIDAD PONTIFICIA DE SALAMANCA

1. University Short Description (About 300 words)

The Pontifical University of Salamanca (UPSA) is a private catholic Higher Education Institution. The University has a clear social function, which reflects in the cooperation with other universities, institutions and organizations with the aim to support justice, development and progress.

The Pontifical University of Salamanca has two campus, one in Madrid and the main campus is situated in Salamanca. UPSA has also several affiliated centers in different Spanish regions.

Our institution has a total of approximately 4000 students.

UPSA offers bachelor studies, master studies as well as postgraduate studies and we count with the following faculties:

- Theology
- Philosophy
- Canonic Law
- Communication: with the bachelor degrees of Journalism, Publicity and PR, Audiovisual Communication, Marketing and Communication
- Psychology
- Health Sciences: with the bachelor degrees of Nursing, Speech Therapy and Physiotherapy
- Education: with the bachelor degrees of Teacher Training and Sport Sciences
- Computer Sciences: offers the bachelor degrees of Informatics and Technological Business Administration

The principal activities of UPSA are research, teaching and internationalization.

Concerning internationalization, the Pontifical University of Salamanca joins the Erasmus program since the year 1993. Within this program we have established agreements with many European Universities. Outside Europe, our largest number of partners is situated in Latin-America, but we count as well with several partners from U.S.A., Canada, and Asia.

The cooperation with our partners is focused mainly on student and staff exchange, but also on research activities.

One of the strategies of internationalization of our University is expanding our network of contacts to more regions and countries, as well as to increase our number of partner institutions in some countries.

University Introduction

Dialog between universities in Japan and Spain

Name of University: Public University of Navarre / Universidad Pública de Navarra

1. University Short Description (About 300 words)

The Public University of Navarre (UPNA), an International Campus of Excellence, is a young academic institution (approx. 8000 students) that heads the list of Spanish universities in terms of teaching quality and the capacity to attract new students.

With an international vocation and a strong commitment to teaching, the University, which has campuses in Pamplona and Tudela, and possesses outstanding facilities and services, provides the local region with human, technological and entrepreneurial capital, and its socio-economic impact is extremely positive.

The UPNA has received International Campus of Excellence certification from the Spanish Ministry of Education for forming part of Campus Íberus, a project in which it participates along with the universities of La Rioja, Lleida and Zaragoza.

The project is based on three areas of specialisation: materials and technology to enhance the quality of life (with two branches: technology for health, and energy and the environment); agrifood and nutrition; and memory, heritage and identities.

21 multilingual Undergraduate Degree qualifications (taught in Spanish, Basque and English, 1st University in Spain teaching courses in English) in different areas of knowledge are available at the University. 30 different Master degrees and 7 PhD programs. All of them gathered in seven centres (Law, Business and Economics; Agronomics; Human and Social Sciences; Engineering; Agronomics; Health; and, School of PhD Studies). We offer around 20 own studies in different knowledge areas including one Master Course of Spanish Language and Culture, Marketing and Tourism where we have 2 successful editions.

UPNA performs intense research work, both basic and targeted, and is increasingly involved in transferring knowledge to the manufacturing sector and society in general. A total of 948 researchers currently work in 111 research groups covering different fields of knowledge and whose work has been externally evaluated twice in the last couple of years, the results proving highly positive. It has 6 research institutes where we collaborate in research and knowledge transfer to the industry and society.

UPNA has more than 300 university agreements in 50 different countries and more than 20% of our alumni have an experience abroad. Each year we manage 600 students around the world. We encourage our students with our own "International Program" to spend one year abroad and take more than half of their studies in English. For example, almost all our BA degree is fully taught in English.

University Introduction

Dialog between universities in Japan and Spain

Name of University: Universidad de Salamanca - University of Salamanca

1. University Short Description (About 300 words)

This year, the University of Salamanca is celebrating its 800th anniversary. Since it was founded by the King Alfonso IX of León, in the year 1218, the University of Salamanca has been committed to carrying knowledge beyond the boundaries of the known world. Thus, the University of Salamanca became, along with Paris, Oxford and Bologna one of the first European universities and today is the only Spanish that has maintained its activity over the centuries.

The University of Salamanca has gone through a time of unprecedented expansion with the creation of the first American universities, which from 1551 began to be founded following the stir of the Salamanca by using their founding statues as a model. More than 70% of the universities created in the sixteenth and seventeenth centuries now consider the University of Salamanca their 'Alma Mater'. Currently, the prestige of Salamanca attracts to itself a confluence of students from all the peninsular area, and even European and American.

At present, the University of Salamanca counts with nine campuses distributed between Salamanca, Ávila, Zamora, Béjar and Villamayor among which are distributed 26 faculties and colleges and the 12 research centers that cover aspects as varied as the biosciences or the laser, passing through agri-food developments, neurosciences, history studies or basic research, among others.

The campuses are joined by centers dedicated to strengthening academic and cultural ties with other countries and cultures such as the Spanish-Japanese Cultural Center, the Center for Spanish-Brazilian Studies or the Institute of Iberian-American Studies, where the continuous movement of teachers and students maintains ties and creates new perspectives of future in the established alliances.

Created in 1999, the Spanish-Japanese Cultural Center aims to promote knowledge and cooperation between Japan and Spain, from academic and cultural exchanges to economic relations. For this, it works in collaboration with the Association of the University of Salamanca in Japan, with companies, teaching and research institutions and Japanese and Spanish non-governmental organizations, as well as with the public administrations of both countries. Among its activities are the teaching of the Japanese language, the Cultural Week of Japan, the offer of courses for professionals and companies, the organization of artistic and cultural cycles, support for higher education and the promotion of research on Japan.

Another of the distinctive features of the University is the teaching of Spanish that attracts thousands of foreign students in the different educational programs developed in one of the largest training centers for foreigners of world renown, the Spanish International Courses entity of the University of Salamanca. Since International Courses, the Diplomas of Spanish as a Foreign Language (DELE) have been developed for years and, recently, the first digital certificate of Spanish (SIELE) that can be done from anywhere in the world and that will carry the certification of the Salamanca study as endorsement to its validity, has been

created by Cervantes Institute, National Autonomous University of Mexico and the University of Buenos Aires and University of Salamanca.

We are convinced that both events, the 800th Anniversary and gathering like this one, are key opportunities to show society that the University still plays a major role in social, cultural, personal and political-economic development.

True to this spirit of openness towards society in its various forms, we believe that the relationship between the Japanese and Spanish Universities reflects the spirit of openness and the best way of spreading that makes humans thinking beings. Therefore, we could say that this it is not merely a symbolic event, but the reflection of an advanced society that defends common values that bind us together at all levels.

University Introduction

Dialog between universities in Japan and Spain

Name of University: Universidad de Sevilla

1. University Short Description (About 300 words)

Founded in 1505, the University of Seville (US) is the second largest in Spain (over 70.000 students), and the first in Andalucía. At the centre of gravity of the city's social and cultural life, the university owns an extensive historic-artistic collection amounting to thousands of pieces. It is on a par with some of Spain's major museums. The Library repository of ancient books (largely digitized), with more than 200 incunabula, is one of the best in Spain.

The University has five main campuses within the city, with 27 Faculties and Schools. More than 7000 agreements with companies and other institutions ensure a broad range of opportunities for work placements, promoting the employability of their students.

As a comprehensive university, the U. of Seville has one of the widest academic offers at Spain. The US Modern Language Centre supports the teaching and learning of languages throughout the university. Strongly engaged in internationalization, annually the University receives about 2.000 international exchange students, and sends about 1.800 US students to universities from all over the world. 2 Erasmus Mundus joint master degrees and 58 international double degrees (11 bachelors, 47 masters) compose the international academic offer, with students gaining both an international experience and multiple diplomas.

Committed with regional economic and social development, the University has more than 500 research groups, and ranks among the Top 8 Spanish research universities (in terms of publications). It is the first university in Andalusia in getting funds from the European Commission framework programmes.

Through own Research Institutes and Joint Research Centres, the US has set up strategic alliances with other research institutions, strengthening collaborative research in areas of common interest, in order to increase productivity, competitiveness, and international impact. The University of Seville is leader in knowledge transfer, ranking within the Spanish first three in national and international patents, and industry income.

University Introduction

Dialog between universities in Japan and Spain

Name of University: ESDi Higher School of Design

1. University Short Description (About 300 words)

In 1989, several public administrations, business and Company groups in the design sector came together to strengthen Catalan industry by professionalising the work of designers. ESDi was the fruit of these efforts. The aim of the University was to provide to Design students the skills, know-how and competitiveness they needed to make their mark on the world.

The foundation of the school, the launch of its degrees and its association with the Ramon Llull University (URL) were not the only steps taken. ESDi also forged an Alliance with the Fashion Arts and Techniques School (EATM), a leader in the field of Design Education in Barcelona.

ESDi has over 14.000m2 of facilities distributed along its Sabadell campus and its extension classrooms in Barcelona (Passeig de Gràcia). The facilities include computing classrooms, industrial, manufacturing, serigraphy and knitwear workshops, video studio, professional editing rooms for audio and video, etc. In addition, the school has incorporated 3 self-labs with cutting-edge technology (additive manufacturing and 3D printing, immersive and holographic virtual reality and digitalization of textile design and manufacturing).

Since then, the School has incorporated an officially-recognised University Degree in Design and progressively built up six itineraries in Design. These itineraries are: Fashion, Product, Graphic, Interior, Audiovisual Design and Design Management. The University Degree in Design (Bachelor level) is also offered in English. ESDi added Master's Degree and Postgraduate courses and internationalised its activities.

ESDi's graduate offer in English contains MA UI/UX and MA Fashion Industry and Design Management in collaboration with MANGO. Following the internationalisation of the school, a Bachelor in Smart Design has been created; a program for the connected, tech-savvy, innovative designers of the future. Given that technology must go hand-in-glove with human qualities; the Bachelor in Digital Humanities came soon after to meet the needs of a world in which analysis, understanding, and projection are slowly breaking down the barriers between Humanities and Science.

University Introduction

Dialog between universities in Japan and Spain

Name of University: Universitat de València – University of Valencia

1. University Short Description (About 300 words)

The Universitat de València is a modern European University founded over five centuries ago devoted to a wide range of disciplines, cutting-edge research and culture pursuing education, learning and research at the highest international levels of excellence. Among its fields of studies, the Universitat de València offers, spread out in its three campuses, experimental sciences, engineering, health sciences, humanities as well as social, economic, education and legal sciences. With more than 48.000 students, nearly 5.000 teaching and administrative staff, 18 Faculties and 92 Departments, the Universitat de València aims at training competent professionals as well as fostering outstanding research at international level.

Its libraries hold nearly 1,5 million books, more than 26,000 journals and provide 4,300 reading places for its almost 60,000 users. Along with the human resources, the magnitude of its facilities and the available up-to-date instrumental equipment guarantee the quality of a vast scientific and technologic offer to the service of society.

The Universitat de València is recognized as one of the most outstanding Spanish universities in both national and international rankings with a production of 63 % of the indexed references of all Valencian universities and ranks third among Spanish universities in indexed scientific production.

One of the most outstanding features about the University's internationalisation strategy is its role within mobility actions. The existing consolidated partnerships in South and North America, China and Europe together with the recent expansion to the Asian countries, ensures a dynamic flow of both students and staff.

University Introduction

Dialog between universities in Japan and Spain

Name of University: UNIVERSIDAD DE VALLADOLID

1. University Short Description (About 300 words)

The University of Valladolid, founded in the 13th century, is one of the oldest universities of Spain. With about 3.500 academic and administrative staff organised in faculties and schools with campuses in four cities, it allows over 30.000 students to choose from more than 100 study programmes, 50 post-graduate courses and 80 Ph.D. programmes. These study programmes are uniquely designed in intensive co-operation with enterprises and other relevant stakeholders.

The University of Valladolid is making every effort to have its scientific potential channelled into research that will be ever more useful to its surroundings.

International co-operation is a crucial cornerstone in the University of Valladolid's strategy. It has concluded not only over 250 co-operation agreements with institutions of the five continents but also over 1.500 bilateral Erasmus agreements, which have enabled the exchange of over 1800 students and 400 lecturers in the past year. It offers courses in other European languages and has developed double degree programmes together with prestigious institutions in France, Germany, Italy, Japan, Vietnam and Mexico.
